

1929

**Innovational spirit
from the Black Forest.**

**1929 till this day ...
and in the future.**

The company was founded by Hugo Müller in 1929. Within a very short time the innovative company had become well known in the locality as a manufacturer of high quality loudspeakers, headphones, radio assembly kits, radios and, some time later, radio time switches.

For Hugo Müller, the change to electronics occurred in 1978, when the first time switch capable of being programmed for a year was introduced to the market. Its success was also virtually pre-programmed – the new product was exceptionally well received.

Today, time switches continue to be an important element of the product range, albeit with features which are subject to continuous improvement. This characteristic reflects the Company's objective for the future. The consistent optimization and expansion of the standard product range, including tailor-made products to meet individual customers' specific needs.

Our product solution range includes timing devices such as analog and digital timers, master clocks, hour meters, count down timers and light control devices such as analog and digital twilight switches, astronomical time switches, stair-case timer, dimmers and also devices for climate control and building automation (KNX).

Latest production technologies.

We place considerable importance on complying with the latest state of the art at all times. It is only by using modern production methods that we are able to make products which satisfy present-day requirements. To meet the demanding standards these impose, we employ the latest production equipment e.g. in our SMD and Heat-Seal-soldering technique.

The quality of our products is also assured by the fact that we have our own injection moulding shop, enabling us to manufacture to order and on time. The same goes for our pad printing, on-demand printing and laser marking. All three technologies ensures the individual marking of our products.

Best quality from development to the mass production of our standard product range and of tailor made products.

ISO 9001

Today Hugo Müller specialises exclusively in instruments for “switching, controlling and counting” and headphones have long been a thing of the past. At the same time, our products continue to stand out by virtue of their quality and reliability. Given the regional tradition for excellence in light engineering, it is not surprising that Hugo Müller products acquired a reputation for durability and precision from the very outset.

“We do not assume quality – we manufacture it.”

Order processing flexible and on time.

Being a firm of "manageable" size, we are able to react rapidly and non-bureaucratically, particularly when dealing with individual customers. In addition to our standard range, we develop and manufacture tailor-made products. We handle everything, from the original idea to the mass produced article. In this case, mass production means "exclusive". Whatever we develop and produce for you, we keep strictly in-house.

Our individual service:

Where you are, we are – not only geographically speaking but also "in spirit". This means that we can supply you with products which meet your needs and give you satisfaction. Competent people are always willing to help you to resolve your problems.

We are looking forward to new challenges and the ideas of tomorrow.
